

PID GAMES (Paediatric Infectious Diseases Games) are a new interactive educational event that will expand your knowledge in the field of paediatric infectious diseases.

The PID GAMES is a three-day course consisting of four modules on different exciting topics (e.g. bacteria and antibiotics, virus and vaccines, emergent infections and infections occurring in the immunocompromised host).

Each module consists of lectures by experts from around the world, clinical cases, a pro/con debate and a real competition Quiz between the participants. The winner of these games wins a free registration to the next PID Games or the next ESPID annual meeting.

**Requested accreditation to the European Accreditation Council for Continuing Medical Education (SEAFORMEC)**

With the endorsement of

European Society for Paediatric Infectious Diseases

**24-25-26 October 2024**

Auditorium (Level 1 Pediatric Cancer Center Barcelona PCCB Building)  
SJD Barcelona Children's Hospital
